

## KURODA Space base and technologies

With all participate to space that cause all cooperation to government and build bases with the highest technology and systems. All contact with space and alien asks any possibility to the futures.

All these are to be corporatized and ask all participation of enterprise with a new technology.

These stocks are held up with us and running and decision may be cooperated to all possibility to the futures.

Build a bases that has all potentials to ask own participation to space. And conference space that permit contact with space and ask own discussion with all politics and government.

Computer system may permit standardize any possibility to be unified with space and contact.

Development of space craft may be needed to own use for all journeys to universe. These are under cooperated with enterprises.

Own incorporate environment asks relations with internationally to any realities.

All its proposal is relationship with universe and individual nation that any possibility we can work for.

These are all new possibility with the world and age to be participated with space. That we are trying with next generated technology.
