

Launch of the Asian Unity Federation

KURODA International Consulting Takeshi Kuroda

Except for Russia, we are trying to unify the Commonwealth of Independent States, Collective Security Treaty Organization, Shanghai Cooperation Organization, Eurasian Economic Union, conference on Interaction and Confidence-Building Measures in Asia, Economic Cooperation Organization, Central Asia Regional Economic Cooperation, Association of South East Asian, South Asian Association for Regional Cooperation, and League of Arab States. These are the basis of the unification of the whole of Asia.

These have received all the technology of Russia, and we are trying to make our reality into a region.

We could build a presence under all these unifications. We could seek equal presence in any realities of the world, and we could face the coming future.

Under any circumstances we have in any reality of the world today, all these unification could stand equally to any reality of the world.

And we have all new technologies and could make unify of itself could give us any possibility in economy and militaries.

We could have a vision of the world under its foreign affairs. And could try to contact the universe to have hope or any possibilities for the future.

Under this unification, any society is under new technologies. Unifying all military, economic, and social standards proposes a new reality, with a clear self-vision for a contemporary society and world and a responsibility to the world.

These are clearly opposed to establishing a world government in the United Nations, calling for an independent union.
