

## Liberalism and creativity

June 22<sup>nd</sup>, 2024

KURODA International Consulting

Takeshi Kuroda

At the heart of this exploration lie the tenets of humanism, liberalism, and creativity. When applied to the act of creation, these principles can be seen as manifestations of the future.

These are the justice of any people who dare to seek for themselves. On the other hand, we may find authoritarianism.

We can find all these are the decisions of all people as they seek their future.

We have the proper explanation for all the realities of the world today. Under all these ideas, we may find the axis of evil.

But another point of view is that the liberal camp is totally under the control of the Illuminati. These are the irony of the world.

But we find all the excitement of reality from that reality. That is any creation by the economy of the USA.

As you may find out, we, KURODA International Consulting, offer a 3rd-world vision. We are trying to divide the world into three differences.

We equally have a choice that permits the future itself. We have many ideas that may help you all.

All talent must consider the world's design, and the world must accept its proper vision.

The word choice is the progress of all history. So, plenty of ideas must be gathered from all over the world.

This is why we need all human saucers to recreate the world, and we need people who have all the skills and ability to realize them all. If politics is king, he has a decision.
