

Matelotage conference

September 18th, 2024

KURODA International Consulting

Takeshi Kuroda

We have one with a Davos meeting. But we made it under our ideal and world vision through our conference.

We have to gather talent from all over the world and make any decision for our reality.

Any progress of all ours may be shared under this conference, and we may see it may gain all-new reality of the world.

These are any cooperation we may share under the same ideal and world vision, and they may have any reality in the world.

And all these conferences must have world decisions.

For reference, matelotage (French: matelotage) was a type of civil union that buccaneers and other pirates formed with other pirates during the Golden Age of Piracy.

These are the conferences of the new elite from all our realities.

We must have these issues with a world and a new relationship with space entities.

We are calling for initiators from all over the world and are proposing the creation of a new world and future.
