We now first face the reality of the world. And these are only the beginning of it resetting.

The new war, following America's entry, would aim for the complete collapse of the peace in the Middle East and the establishment of a new world order.

A new world government, proposed within the United Nations, would be established with justice, along with control of the media.

These are the new framework of the world, which may contain all new ideals, but instead we need to ask the truth about them.

The Great Reset is a recreation of all realities under plans. We can see a word from the Davos conference.

Any religious reality must be denied under new laws. And all media have their control from Langley.

And the rest we can find is what the universe may have decided. That causes a part of reality here on the ground.

And we have only our choices to make our world visions a reality. But under the power balance of all realities, we need to cover all our realities to stand equally in the world.

We need our ideas to bring our realities into being. And any justice may be shared under a new dialogue with the world.

Ultimately, dialogue is a decision on which we have a last bet. And the realization of any reality is the only possibility for us to seek the future.

We have tried to draw new pictures from our office. That is a new design of the world.
