Takeshi Kuroda

All the financial conditions of all nations could forecast the future. How should the world hold itself? We must find the tail of the world that is the world's financial capital.

As we see all the trends of lives today with a world, We have a choice for the future. The world's madness has a future with it.

We can predict that the Western camp will lead these, and the world order will completely collapse. That must be a reason that there is called a new world order.

It must affect any field of society and life. And any confusions are still seeking for the future.

But on the other hand, we must face a new world with wealth and trends. The world has a future even under any realities.

These are the total collapse of any existence. But the world has a new rules and laws.

From the point of view of finance, All capital must have a future, as black Friday existed in the past. And we know who gained the wealth at that time.

In all these circumstances, we may raise a vision and rules. And all reality must follow them.

Under all these collapses, we could reconstruct all realities to reface the world.

We could forecast the future under all financial conditions of all nations. And we need all detailed plans and visions.

And we have to ask for the decision under military power. That means we can not be away from reality.
