

Middle east

October 23<sup>rd</sup>, 2023

KURODA International Consulting

Takeshi Kuroda

Any reality we could forecast in the Middle East is that we must know all concerns with Iran, Saudi Arabia, and China. Western camp must rim their hand and have to build their justice. Saudi Arabia has an alliance with Israel, which means they could be with the Western Camp to face any change.

If the alliance between Iran, China, and Russia fails, we may not find a choice in the future. Any media under its control must raise justice against them, And all these media control must seek the world government.

The world without hope is not an allusion but the reality we have today.

And there is a truth under all these circumstances: at the moon bases of the United Nations, we see all contact, and they are trying to interrupt any reality of this planet. That causes all the changes here on the ground.

And we could find any purpose in space, and they are trying to join all reality here on earth.

Any contact with space, starting from the age of World War 2<sup>nd</sup>, made all these works successful. That is the new world order.

There is a reality called revolution. To face any truth of the world, the world must ask for its revolution. And we may not know how the result should be given.

On the other hand, the new elite with high trends life should cover all realities. We are facing new kings.

The people may face their own choices, and all must make their future according to their own decisions.

The future must be forecasted. Only we have our own decision to them.
