

NATO

October 14th, 2023

KURODA International Consulting

Takeshi Kuroda

We have a definition of reality called NATO. We need to face them at the last moment of the history.

Industry and capital, military, and space technology are the comparance of reality we must know to put ourselves into reality.

We do not have a choice but to face any realities. How could we decide on ourselves to their technologies?

The world is under their plans. And who could stand against them?

We need to find a way to the future. We need our decisions against their military power.

Under power politics, we need to know power decides the world but never with justice.

Asian union must stand equally to them. And we need to find an opportunity to make all our realities.

We may not be away from World War 3rd. That must be our decision.

Diplomacy could be any solution under any circumstances we have with the world. That means we have to ask for our reality.

We may seek any of our reality, but we have to know NATO has the power to any future that we put ourselves into all those realities.

We must be more than wise to make all our realities since we may not fail ourselves in the future.

But we have to know we have our choice that could make all our realities.
