New conflict may cover the whole world, with a new power balance of any realities. Liberal camp with a new world order should seek their plans, and the other opponents may ask themselves against coming changes.

And we see that aliens have their own actions. They have plans here on the ground.

All conflict may be the reality of the future. And these conflicts must cover the whole world.

Diplomacy should be the tool to gain any reality under the new conflict that should cover the world.

To face the world on an equal footing, one must have one's ideals. This is the way to secure reality to the greatest extent possible.

If diplomacy makes it possible to create a new world, we have a full opportunity to try it with a world.

Ideals may not be any illusion under all those realities we have with a world along any truth of them.

We can gather all new young talent and human resources to redesign and take new actions in the world that any race or nationality should not judge.

These new foot points may cage any access and presence, which differs from all realities. The secret of reality is that changing oneself means changing all realities.

Any determine of mind gives all defecation of reality which is certainly promised to realize them all.

And politics always lead them in any reality.
