

New decision of the world

December 30th, 2025

KURODA International Consulting LLC

Takeshi Kuroda

A decision may give us hope. These are requests to all politicians.

With renewed determination, we may discover a new world and redesign all realities for a new civilization.

It means we have the will to create new civilizations, and it may not be an illusion if we make the right decisions.

How do we propose new pictures of the world? These are the progress of our histories and our beings. And these are only caused by our intelligence.

The new system must be reconsidered in light of our philosophy. And we have all the latest technologies. Moreover, we face unlimited possibilities throughout the universe.

These are the realities we have today, and decisions may take us in any direction in the future.

We do not need to follow all realities, but any determination gives us a new consensus of the world.

And these are all necessities for us to recreate the world. So we are pleased to ask for any argument from all progressed intelligence on the earth.

These are what we would prefer to propose to all international societies. And a decision may help us realize it.

So we need to invite talent from all regions of the world, and their skills and abilities may have the potential to create entirely new realities.

We have our office where we are trying to send all new messages to the world.
