Takeshi Kuroda

If we seek paradise, we need to take a step forward.

Is there any possibility we could make them? We need a plan and actions.

A painless and sufferless world is any ideal of humankind. This is a proper goal in the history of humanity.

New technology gives us the future of the world. Bases are new social systems and frameworks.

We need to consider all our documents. That only permits us the future as all new possibilities.

Politics may determine its mind against the world. That is the only possibility we find hope in the future.

We may reach an idea for the future. That is all calculations by all progress of academics to recreate any realities.

Now, we are all ready to step into the future. And politics may have all decisions of them all.

There are more possibilities than we could find in the future. And we have all the necessities to realize in the nation and the world.

Under all progress and consideration of academics permit and gives all possibility with society and the nation. These are the recreation of any realities of the future.

Any design and decision must be considered under politics. And they have all new realities under the new consensus. We have a future under new choices.
