

New future under the all-new decisions

April 22nd, 2025

KURODA International Consulting LLC

Takeshi Kuroda

Even if we are confused or do not know the truth about the world, we have an opportunity to put in all our effort to create a new world.

And if all these come from any dialogue with the world, we may ask for any ideals and hopes against any reality of the world.

The final countdown is all we are faced with, and it is the reality we have with the world itself.

We, Kuroda International Consulting LLC, offer several world visions that are within any calculation of all reality we have with the world.

We now face the last occasion which the world itself with his truth. Then, the dialogue may only cause any opportunity and possibility under cooperation with any race and nationality.

We have tried to redesign the world from our office. We have our dreams with any design of the future here with an earth.

What can we see with Almaz's project from Russia to the universe? And what shall riot receive?

We are now asking ourselves for new steps into the whole universe. These are the era in which we put ourselves within.

Our only permission is to put ourselves into the world's reality.

This is all the reason we have proposed the future. And you have all the decisions that create the direction of your future.
