

New idea for the world

February 22nd, 2026

KURODA International Consulting LLC

Takeshi Kuroda

We have all progressed in reality today, and they may give us an idea that we have all new hopes for the future.

And to expand all our realities to the universe, we may find new contact with all its residents.

These are the ideas we may seek for a new future amid all evolutionary changes, a new world with new lives.

From the point of view of politics, we have a duty to all people, which must be passed to put them into a new world. And all progress of any reality is fully guaranteed new comfort and livelihood in new futures.

Progress is the keyword. They can give us a new world and the future. So all politics may determine themselves into a new world.

We can redesign the world under new systems and any frameworks. They may give us a new consensus and agreement among all nations. These are the new unification of all realities.

The Matrix must be the entire reality of the world, so we need to argue with the universal resident to resolve all realities.

Then we have all our decisions to the whole universe, which may be a decision of all our futures. And we may join their groups under any cooperation they may offer, including advanced academics and technologies.

We can see that all these are realities of politics, and they may help us realize a new world.

These are any turning points of ages from the past to eternal futures. We may consult your decisions to the world. These are the habits of our business
