

New moral as SDGS

KURODA International Consulting

Takeshi Kuroda

There is a new movement yelling with new morals. Socialists may rise for all-new justice to recreate the world.

But we must know that all these ideas come from the CIA office.

All these are the effect of all evils, but we see the justice of theirs. All these are away from humanity. That is what you have to know.

We must stand against all mistakes. Humanity must be the bases of any requirement of all ours.

We need the correct fundamentals of society and life if we seek a new world.

Even from SDGS, we could raise a new vision under all calculations of any world's reality.

New philosophy may be the base of any reality in the future.

If we are trying to build a world, we need a philosophy of its bases.

Due to all those ideas have all creation of any realities.

We may wonder why the west could ask for their presence. It is deeply considered in their history, which is all reason we must know.

We have to argue against our ideas even with a thought. This is the only permission we have to stand equal to the world.

We have to be wise. That only allows us to participate in the world and the future.
