Creation of the next society may give new future to a nation. And all these are required by domestic capital and industries. These are how we can ask for our own independence and its future under the independence of the self.

And a new possibility we find in the universe may be realized under any new relationship with a space resident. These are caused by the new alliance with them.

A new social system may gather all social realities, and digitization may unify them into new social systems and next societies.

We need all recalculation by the progress of philosophy to recreate all realities. The progress of academics permits us to create all new livelihoods.

A new definition of politics must be to serve all people and take responsibility for their lives.

Diplomacy is only accepted under equality and one's own independence. These are the standing point to any reality of the world.

These are the idea and rough sketch of new futures. And we can redesign all reality to a new one. And in domestic reality, these may be a consensus and a new basis that recreates all the reality of the nation.

We may gather all reality in the globe, and this cooperation may give oneself a new basis to ask for new steps into the world.

Any decision may allow us to realize any visions. And these are the habits of politics, and then we may gather all the new talent who have all the skills and abilities that promise us to realize all the above realities.
