

New socialism and world decision

KURODA International Consulting

Takeshi Kuroda

Based on basic income, we are asking for a new social system. These guarantee life for everyone, and we are stepping onto a new world stage.

We are trying to make a new world with all possibilities as expanding to the future and all universe. A new social system guarantees life so that we may seek a purpose for life.

Communism is as same as new socialism. If life is guaranteed, we could make a step toward new possibilities. That causes us to invite into a new world as a new reality.

These are with a new social system that means we have an all progress in history and finally reach a future.

What is next? We are digging ourselves into participating in the universe. We may ask for a new friend.

All new technologies give more than any comfort to society and life. There are all new creations under politics with a new world.

We have a variety of civilizations. What can we find in the future if we could share and create a new world?

Equality serves all people to participate in the new world. We have to know that we have a new future.

That forces us to know that we need all bases, that is, humanity, to rejudge all reality of the world.

How do we imagine being in touch with the future under all use of technologies and social systems?
