

New space ages

November 4<sup>th</sup>, 2023

Kuroda International Consulting

Takeshi Kuroda

We have a new step into the universe and may know we have a new future.

We need technology to travel the whole universe with our starship. This is a complete necessity that we need to cooperate with the universe.

As we could prepare all bases and environments with infrastructure and human resources. This gives us the possibility to create a new reality in the future.

We could create all relations with the universe. And we could have all the fundamentals and reality to be concerned with the space.

We could imagine any reality we see in the Holly Wood movies. And we are determined to make them in the future.

All these are under political consensus, plan, and actions. Any diplomacy with space may be served all academic progress and the progress of all technologies.

We are limited in the earth in the past, but in the future, we are trying to share any possibility with any friend from the universe.

We could recalculate the nation and society under new academic progress that may give us the future.

We may know that we are standing right in front of the future. We have an opportunity to seek new possibilities.

We need the right decisions and actions to be in touch with the new future.

Detailed plans and calculations are with all human resources to make a reality to seek for a purpose. We need the right step into the future.
