Takeshi Kuroda

Reality only exists that we could ask for even a step within. And these are the only basis we could ask for the future.

Do we have a future? To be in touch with the world, we have an answer.

Is there any way forward we can find? Determining the mind may be the only suggestion we find the truth.

The world is covered. We only have a choice to put ourselves into reality and the future.

Power is a justice we find in the world. And all politics must follow all those realities. All new trends of reality as lives affect all peoples, that is, any movement of realities.

The Western camp raises their justice and seeks for all their future. All these are the reality that may not give us a choice in a reality.

Military is a reality that holds the world at peace. But we have a future that is out of all our imagination.

And we have an answer that we need to prepare for the future as any changes. That may permit any future reality with us.

These are under political calculations and actions.

We have a choice to cause us with the future. And all power games seek them to the end that we all know.

Any basis is the tail of the future. That means building up our nation, which gives us a different future.
