

New world Vision

December 1st, 2023

Kuroda International Consulting

Takeshi Kuroda

Under the consequences and unification, we could propose a new world vision.

We are trying to build a new world under any nation's agreement. And we know there is a new world order, but we are sending a new world vision.

A United Nations is a place that seeks a world government. But most votes may change the reality that we could try with our efforts.

All these are agreements for all peoples with a new world. We are willing to take on all the duties for all people.

For all children with the same educational environment. And the new society to be provided to all people.

We are leaving any competition to the new world with peace.

With a new cooperation with the universe, we ask for new possibilities that may expand to an unlimited future.

Bases with basic income may serve us new realities for all new technology with new lifestyles.

We have all new ideas for the shape of the future and the world. We need to design the world anew.

Peace could be any agreement of the world with its unification. These are the new world with new dreams.

The world with dark nights is our reality today, so we need light and hope to work. And we have a choice for the future; that is what I have done.
