

New world order against the others

KURODA International

Takeshi Kuroda

Who has a world? Out of any doubt, the Illuminati and his king. They have any control and contact with the universe.

They are trying to own the world under the world government. That world has without divided by nation but by one world.

All of these have struggles. The others do not have permission for the future. We could imagine the battle among them.

There is Armageddon without any doubt. That call time has come.

We may follow all letters from the bible, but who knows the truth. There must be concern from the universe. That tomorrow never knows.

This end of history is an actual reality we may not be away from.

This must be the liquidation of history that we are facing by truth.

That is all ways we may not away from.

Let me ask a question, who may know the answer?

With a victory, they could reach to be a king. We may know that who is seeking all those.

We could guess the end of moment, but this is not a lie that we are facing all realities.
