The world is forced to make its decision facing new futures. Instead, we have no other reality that may be only found than Langley.

Even in any reality of the world, we need to seek the future. And these are the realities we are with hopes of ours.

We may not only follow realities which may be caused by the world, but we also need our will to decide on them.

If we may realize ideals, what is on your mind? Actions and decisions may cause any realities. These are how we design the futures.

Any future is never determined, but is created by our wills. This is how we find the future.

And we can see all these are the changes in any reality of the world.

We all have our decisions and choices for the future, and they may cause any reality in the world.

Survival principle is everything in the past. But how can we change in the future? We have our decision on it.

The future may be changed in any way. You have to see the movie Back to the Future.

These are the proposals on how we can seek and find the whole world. And it may not be impossible, but we may find any of our realities in the future.

All new intelligence may find all new ideas to the world, and it may realize new reality in a part of the world.
