

Promise

April 20<sup>th</sup>, 2024 Kuroda International Consulting Takeshi Kuroda

The world plan started in the Middle East. These are the creation of the new world.

Waiting for a new world government that is a reality, we find unification and a new world.

This world has chosen people. They are the top elite we must envy. They have a world and a future that may not be caused.

These are new worlds that come with control. Instead, we could raise our justice, which is called freedom.

We are facing all wars. But if we can find heroes who give us hope and hope for the future,

What is a promise? That must be a future we dare to hope. In world politics, we must find our king.

We, Kuroda International Consulting, make our world design and plans. We are trying to be in touch with the world.

How can we find hope in the future? We all know the world's reality and truth. That means the world is a dark night.

The promise is made. That means we have a new world and the future under all its freedom. Who could determine to pay all new responsibilities to the world? That is what we have tried.

And under any reality and the truth, how do all people find hope and the future? That is all the reason we need a hero.

We could ask for our decisions with World War 3rd. And we need to find who determines ourselves in all these realities.

KURODA INTERNATIONAL

We can't follow any directions, but our own determines of the mind to make the world new.
