

The organization and USA

Kuroda International Foundation

Takeshi Kuroda

To see all presence of the USA in the world, we can find all tails of their variety of organizations. Pentagon and CIA as political bureaucracy, Washington D.C. are any bases they are permitted their presence to the world.

That means there are all requirements to build all politics with tails that may only permit reality with any actions.

Here, we find political choices and decisions that cause with any reality as future. We may ask for all circulation to settle all reality of the nation.

I think private organizations and the political environment should probably be emulated. I could say that we find equally from their environment with realities.

Bases with all these organizations are equally possible with reality. A political presence may ask for its progress from all these realities.

As we have to know, all circulation of the foreign affair is only possible from all bases.

Then only permitted politics to ask himself, asking of a nation, to ask for all decisions.

Expanding for all new possibilities comes from all tails of the environment. And it asks for a measure of its progress.

These are all necessities for a nation to build up itself.
