Takeshi Kuroda

As we see, all people in the Gaza Strip have no way out of hell. We have all holly wood movies as we see all Heroes. But reality must be sad, so we must go to the movie theater.

The only solution we have is political action. As we can see in reality, it is hatred. Hatred makes it possible, as we know, any reality in the Gaza Strip.

There are all people on this planet, and we all have the same reality in the past of our beings. We have to know it comes with all people. And we all are more than any tired of these realities. That means we need a future with a dream.

And we need to know who has all celebration with all these realities. How many tears could we count on with all these realities?

This must be a means of peace That we could share and solve any problem on this planet.

King must serve for all people. That means not for a part of them.

I give you one truth. Hatred may not ask for even a solution. That means we need love instead.

As we see, There's a boy whose father was killed, and he put himself in Hamas. And he is killed under all these circumstances. These are any sources of all hatred.

For any result of all arguments, peace is a solution to any realities we have on this planet. This could be a consensus of any politics.

And we find all tears with the people of Israel. We need to know this must be all answer to wars. And we have to ask for all doubt against any realities of the wars as we see in any history. Who has a profit and benefit from all these realities?

Trustworthy politicians could give us a word and must be a light to our future.
