

Participate in the world anew by changing yourself.

KUROD International Consulting

Takeshi Kuroda

Humanity standard is a law of the world as any globalization has a justice of theirs. Even though we have all tails and truth of the world, we can agree that humanity is all common we spend ourselves.

Asking for any calculation by humanity, we may ask for reconstructing the nation's reality as all new bases could make it possible to ask for contemporary foreign affairs.

Back to our own eyes, our nation, we find all new technologies as we try to build a contemporary society under society's 5.0 standard. This is the right decision to seek a future.

Different selves are permitted different futures and realities. As you may consider all your problems, we can find all reasons.

We could share the same rule and laws. Fairness and equality are all common. We may seek the same future.

We find inhumanity problems with Uyghur, Tibet, Myanmar, and Afghanistan. But under the UN Commission on Human Rights, it is possible to accept its recommendations and call for reality fully. It should be noted that Japan rejected the UN recommendations and chose World War II.

Dialogue in truth is the final challenge. Then there is the option of war.

The future may not be owned personally, but the same consensus could be shared as the world and hereafter.
