

Participation in the world with responsibility

KURODA International

Takeshi Kuroda

Responsibility is any requirement and condition you may ask for any of your dreams. Right is only served under all bases.

How may you find a wealth of the world as it is called experience? That is what you can find all wealth with a globe.

The world is changing rapidly as there is all difference within. This creates a new world in which we may ask for any participation.

Responsibility is holding the world with equal effect on their bases. That only permits your dreams.

There is all excitement you can find with the world even expanding with the responsibility of nations.

There are sharing all new experiences. That permits all your dreams under.

Even with International society, responsibility is only to share themselves with the world.

The world only may be held up himself with responsibilities. That is a reason why you need them under your participation.

If the world is throwing away its responsibility, who may have the world?

That must be all proof of what you can see.
