

Pax Americana

KURODA International

Takeshi Kuroda

Their presence expands under unilateralism and technology. But the difference comes they are out of their justice.

What they must know is that justice gathers the world.

That was an age of theirs. But they sought their way and future.

Their wealth and lives may ask differently for the world. A new age is different but not to be known.

There is all growth of all nations with new lives. All talent may challenge the world. That means the USA may not be an only but all.

This is an irony that they have to face. They all are the child of America. They are asking with freedom and ideals.

They may seek new eras that all new technology and system under their dreams.

The reality of the world is only with power. That is proof that justice comes to no use but capital and technologies.

Realists only survive. The idealist may have to die.

That gives them all permission to the future. That means the others are more than all idiots.
