

Political planning

Kuroda International

Takeshi Kuroda

The plan is all promised to be realized in the future. That means we could build the future.

Politics make all considerings to renew their nation under the highest demand from times. Finance asks for the highest cost efficiency with the highest technologies ask for its plans.

As far as we could ask for details that we may have dreams and visions of the future. Only we have to know is that we can do anything under plans.

Plan and action make any reality.

So asking all agree how we desire its nation and academic circulation could give all progress. We need to know that all academics have a full of use.

There are required all plan army and weapon as we seek under any visions with technology and society, industry, space participation, education, foreign affairs, reconstruct any organization under its use and new systems.

All new technologies are society 5.0 and industry 4.0, all compliance bases to build new futures.

There are possible to build all new systems in any field of its nation. We have to reach a future that requires a new social and governmental system, and technologies of its use.

These are under totally new measures, and standards must rebuild any realities.

This causes a new reality, and political determination and decision have all possibilities.
