Potential reckless in Russia and China

KURODA International  
Takeshi Kuroda

I can't imagine what reality would be given when they were cornered entirely. They have a tail of themselves with nuclear weapons.

This power balance is all reality that what we have to know. Additionally, there is economic existence with a world.

These are as same as Germany and Japan in WW2.

The western camp has himself with his justice. He was sorting the world under this justice.

As we may imagine, WW3 may not be wrong under any realities.

This is a truth with all curiosity that justice is from the CIA effect. And United Nations follow them.

Those realities do not give any permission to China and Russia under justice.

This is a possibility that Russian and China could ask recklessly of themselves.

This must give a new power game not according with the new world order.

There must be any nation's participation that could guess the new world power balance.

We may try to know if any information is disclosed and how the justice might be judged.

This must be a new world with truth.
