

Power game

Kuroda International Consulting

Takeshi Kuroda

The above title is all reality in the past and future world. We may not find justice in all these realities. But only to handle all these realities give way to the future.

As we see in Western camps, they stay with those as any action of theirs. But for me, I am trying not to blame them at all. That is all the way we find in the past.

And this is the only way we may seek any realities. That must cause any decision of politics.

It surely is a power game as it is. They have all right to ask for their world. That is what we have to know.

In these realities, justice is the only tool to control people. As you may find, all these justice are from the CIA office.

To own reality is to construct and own reality in this power game.

This is the difference between justice and reality, the difference between children and adults. Politics must always belong to adults.

Under all these consensus, we are permitted to create a new world.

There is a need to kill children to give them a future. This is the mission imposed on politics, the duty to protect the people's future.

All great politicians have decisiveness and severity. And all these are the only way to seek the future.

The challenge gives achievement. Asian unity is the right choice for our future.
