Power seizing the state

KURODA International Consulting

Takeshi Kuroda

The nation is based on people. That is a law and reality we need to know from history. The power game is only seeking wealth. On the other hand, we are facing different from western justice.

This must be the end of all games. The power may not face the people. They are the tyrant. They have to fail themselves.

Power game asks people as enslaved people. So we need justice in all reality to be in touch with the future. Enslaved people may be justice, but they have freedom. That is all reason the west gather the whole world.

Freedom permits any action and speech in freedom as all creation of the world. This is undoubtedly a parable of the north wind and the sun, who are allowed to take a whole world. A tyrant must be failed above all its celebration of their wealth.

It comes not with the end of the world, but hope is backing to the world.

We could ask for all calculations to all reality of the world. Then we find all truth. We see all eyes of people that permit us to know the truth.

West must take them with a victory, which means they have a world and future.

If the hare and tortoise fable represents reaching the future, then history holds truth.

Power games kill all people who give life to the people. They gather all votes and take the whole world.
