

Proposal of a world for all people

KURODA International Consulting

Takeshi Kuroda

Under any calculation for reality, we see all justice from the USA called fairness. We are asking for any dreams of the people, and we have to know the answer.

With a new world, we remember letters from the bible—new wine in a new leather bag.

A new leader could propose to us a new world. This is a new creation of the new world.

If all people reach their dreams, this is a skill of politicians. And as I insist, we need a new leader.

The world may be changed to find all social valuables. They could see their right to the future.

They share the same consensus if politics ask for their responsibility for the people and the world. We could find a new world.

We have a choice to face the future. All these are in the hands of politics. That is the reason we need a new leader.

We could imagine a new world as we have evolutionary change today. It is a new technological civilization under any contact with space.

History may end, and we have a new future.

This is due to the massive change we have today to make the new future,

The world could not be occupied but must be in the hands of all people.

This is a challenge against any reality we have today in the world. If given a new leader, we may follow our steps after his being. We have hope, and we may find hope in the past. The answer must be a future we are equally facing.
