

## Proposal of self-diplomatic measures against China's encirclement network

KURODA International Consulting

Takeshi Kuroda

All these realities are the future under the Western camp to seek them with their world. We are stepping anew with foreign affairs.

These are under the new philosophy to create a new world. We may wonder about the justice from the Western camp, but we are offering different from a new world.

As we can find that there is the tail called the new world order, but we give ourselves its difference.

A foreign affair is a new decision from us to the world. As we may know, the world needs a future.

An open society is open to all truth as any information. We could give any judgment against all those,

Then we may face any justice. Which is a truth that we can work for.

As I give you the truth, equal right means we have all opportunity to face equally to the world.

This was a big challenge from our office to the world. But to be wise, only reality gives us an answer.
