

Proposal to the world

November 10th, 2024

Kuroda International Consulting LLC

Takeshi Kuroda

We must solve all our humanitarian problems ourselves and ask for new relationships with the world.

We are trying to avoid all conflict and share the same vision of the future with the world.

To change reality, we must first correct ourselves to be in touch with the world. There are all new arguments to decide the world with any nations of the world.

Then, we may share all new consensus with the world and work with all nations to recreate the world.

Then, we may find any changes from the reality we have today with a world but a new world with a new consensus of itself.

We all have tragedies, but we must solve them to make the world new. These are any dialogues we propose, with new discussions and arguments.

If we reach a new consensus with all nations, we do not need to ask for any conflict but share the world itself.

So, we insist on new world visions and ideas to create the world with new ideas. If all politics agree on all responsibility for the world, we first gain the right attitude of all politics with new world agreements. All nations should share any possibility of the future, and it can be a new world.

All these are from any political cations, and he may have any possibility of making the world new.

We sought all responsibility from the world to solve any confusion and problems. And it may be the agreement we can share the new world.
