

Reality called desire

February 5<sup>th</sup>, 2024

KURODA International Consulting

Takeshi Kuroda

All conflicts seek solutions to their desires. If peace is any agreement of the world, Abundance and hope can bring about a new world.

All these are proposals to any politics, as we are trying to create a new world with a future. We have all its pain and suffering. These could be all bases to recreate the world.

We all have a choice that may not be stolen, not to be enslaved. We yell with ourselves to dream of our future.

Proper judgment and decision are only permitted in all realities, even if we face any world realities.

No hope is right to understand the world, but following all its occupation and control of the world.

But we have to follow the hope to seek for the future. All these are the only decisions we have to put ourselves into any reality.

Peace may only permit dreams. All conflict and war must steal them all, as it was so in the past.

Any wars had come with the ego and profit of a being. But all suffering and sorrows are all realities of wars, as we find in the past.

With all the above, we have a choice for the future since we have all learned from the past to the future.

We need a complete solution for the world. These are all conditions under which we find the future, as it may be called hope.
