

Rebellion against the world of people

Kuroda International

Takeshi Kuroda

All peoples are under silent revolution to cover themselves with the new world. They are the voiceless people and ask themselves about their decision.

How does all history serve them a reality, and how many kings are deserved his name?

This is a march that they are trying to make their world.

This is as same as the French revolution in history.

They have new technology and life to face against the world.

In my opinion, all peoples have a right to decide the world.

This comes under new reality as peoples ages. It was born in the 20<sup>th</sup> century by the birth of America.

How, with the age of Aquarius the world make his decision?

There is all social progress in the world. This is all for the people.

Who may sake all their tears in the history? We are seeking a messiah who must be with any history.
