

Recalculation of any reality of the world

May 3rd, 2025

KURODA International Consulting LLC

Takeshi Kuroda

We have an opportunity to recreate the world under new decisions. These are the reasons why we are asking for a new dialogue with the world.

Dialogue may lead to a new global agreement, marking a new design for the future. We have all the new possibilities to create a new reality with the entire universe.

We may share all new ideas that create new possibilities for the future. And new world systems may be established under all their dialogue of progressive academics. And this is why we need all human resources to rebuild the world.

With all the unfairness, we face various stresses that may not be resolved. However, the new world may agree on its fairness, so that we are relieved of all pain.

If all roots of the West may cover the world today, we have to ask for their reasons. And they stood themselves with humanity against all inhumanity of the other regions.

And we may come to know the new world through all its dialogues. And we may achieve any progress that encompasses its entire history.

Then we are not forced to follow the world, but we may choose to follow it.

And we may share the new world principles, which are considered by any academic who has the use of their faculties.

Under all the above, we may find equal cooperation from the world's nations and nationalities. These are the agreement that causes the new world.

And we may know that these are among the most progressive conversations, seeking a new future.
