

Reconnection and recreation of the world

November 15<sup>th</sup>, 2024

Kuroda International Consulting LLC

Takeshi Kuroda

These are the reorganization of reality under all our power game with a world. Power is all reality we have with the world, and we can't be away from it, but we are trying to possess equal power to stand against all reality of the world.

The military, economy, capital, technology, finance, society, and industry contain power. You may find what we have tried. We tried to possess equal presence to put our steps into the world.

Under all these ideas, we may gather our groups to settle any reality in the world. So, we have proposed our world vision.

Plenty of changes can be found in the world today. These are proof that we are shifting to the future.

And you may know we are willing to step into all these power games.

Then we need a proper strategy to make our new presence. These are any ideas we, Kuroda International Consulting LLC, have sent to the world.

You may judge all proposals of ours, and you may send me any decisions.

We may insist the world could be totally renewed with any use of technology and new systems.

We can propose any political decisions and judgments for the new world.

Then, new systems may be based on the world with new consensus and rules.

Moreover, we have all our new steps into the universe, we can make new contact with them, and it causes new relationships and cooperation. Above all, how may you find all new futures, and what is your judgment?
