Kuroda International Consulting

Takeshi Kuroda

These represent a consensus among all Asian countries in the United Nations General Assembly that fully accepts the International War Tribunal's decisions and recognizes the nation's complete independence and autonomy.

It also proposes unlimited aid for reconstruction and recognition of an independent Palestinian state. Furthermore, it strongly advocates for membership in a unified Asia, a vision that promises harmony and cooperation.

With all the above, we insist on a world without wars at the United Nations General Assembly.

And we see that we are trying to propose a new world for the world.

We want to present a unified Asian view at the UN General Assembly, resolve the world's double standards, and propose an agreement for a new world.

We may raise all new ideals to the world at our speech in the UN General Assembly, and we are trying to receive the agreement of all nations. This is a world with new hopes but no disappointment.

We must prepare all tails of the new reality, which is the unification of all of Asia.

We can seek the unification of all world nations as we try to make new steps into the universe as members.

As I lead any reality of the world which you have to follow.

The world for all people contains all new dreams for the future. These are what I am trying to propose to you all.
