

Right-wing extremism in Israel

KURODA International Consulting

Takeshi Kuroda

We have to know that this is a decision of the world.

If we may guess any changes in the world, we must know all the above reality as we have to see that they have a decision of the world. CIA media control and agitation follow them to settle the world.

All these are details of the world that we have to know.

If we are trying to make war, all these are the aim that we need.

And there is their world government in Denver, Co. As we aim for all nuclear weapons, we desire all these places with all weapons.

This is the right decision for us to face world war 3rd. Above we could negotiate for the future.

Negotiation always gives a reality. And this is a law of power politics.

The end of the game is back to reality. We are all prepared to use weapons and face the right attitude to world war 3rd.

Above all, we are trying to build cooperation with the world. And all settled by any reality, we are giving the final decision.

We were following any light in the dark. What can we find an answer to?
