

Rough sketch of new contact with the universe

October 22end, 2023

KURODA International Consulting

Takeshi Kuroda

We could seek a new alliance under cooperation with space residents. And we have to know our steps are forwarding to the whole universe.

All these contacts ask for technology transfer and a shared future. And we have to know all these expand any possibility of the future.

These could cause us to make our stage for the whole universe. All these ideas are under new alliance with the universe. And politics has its own decisions.

And all this technology creates a new reality for the next society.

We must imagine that if we step into the universe, what are our decisions? How many alliances should be needed with the earth?

And we do not have to limit our dream to the earth but the whole universe. May we dream of the future? That is my question to you all.

We do not need any tragedy but all new dreams. That is the proper decision of all politics.

We need the leader of our dreams. That means we need honest politicians with the same motive as Mr. John. F. Kennedy.

Who gives us the dream? I give you an answer. That is a Politician. And who gives us disappointment? We have the same answer.

All people are following any step of themselves with all politics. That means politics can change the world—a new consensus could make a reality of the world. That is all my challenge at this WEB site.
