

Russia

December 13<sup>th</sup>, 2023

Kuroda International Consulting

Takeshi Kuroda

If Russia fails, the world must be changed.

In all military reality we see in Ukraine, NATO may not ask for another army. All its power balance must fail and seek a new world.

Asia must cover after. Presence must have a new vision and thought to share the world. We are participating with a new attitude.

Equality is only gained by the same responsibility. We are trying to take a new step with a new attitude.

Sharing responsibility accepts equal standing points to the future. We raise our vision and share all discussions to recreate the world.

Russia has nuclear and space weapons. These are the power balance of the world.

As we try to have the same presence as NATO, an equal conversation may share the same world and the future to the unification of the world itself.

All these power games must be ended under a new consensus of peace and its unification.

And Russia may have his decision. All information is on any basis we could work for.

We have all the calculations of realities under information and military. That is only everything we have and could work for.

Russia was another pole the world had. But we could find all the changes in the future, and we have to handle the coming future.

To be prepared for the future is the only permission we have.
