

## Russia's Weakening and New Military Map

Kuroda International Consulting

Takeshi Kuroda

Russia's weapon exhaustion can no longer call for new wars. That gives decisions and a new military map of the world.

We may see a last emperor called the People's Republic of China. The world is divided into two differences. That is based on the New world order.

All these give us a decision and understanding. Cold wars have held the world since the age of the Soviet Union. Space weapons have saved the world under the past military balance.

We are facing a new world. That is the right idea that we have to see. Russia's failure totally breaks the military balance.

Then we are facing all reality of the Western camp. They have a new world order.

These are the reality we have today. Upon we could ask for our decision to the world.

As we could expect, world war 3rd will be imminent. Illuminati plane the world. That is what we all know and agree.

Only we could cause against it comes based upon reality as the truth. This is the only permission we could ask for any steps.

The ideals of neutrality and peace, together with a new world vision, can enable participation and self-presence in the world. These should have possibilities such as cooperation with space.

As you may find any ideas from our office, we could step into the world under any reality and the truth.

We are trying to make a way to the future. You may follow my steps.
