

Russia and International society

KURODA International

Takeshi Kuroda

The international public opinion calls Putin a devil. But they have their tails called new world order.

Public opinion unifies its justice in populism. But they are created by the CIA as the orange revolution in Ukraine.

It is all different in International public opinion, and the attitude of America do not ask their justice.

The atomic bomb is used to settle the reality that all may not ask any steps.

I doubt that if people take over the world, how are they trying to manage the world.

Justice may not be a lie, but the truth that is we may seek the real hero.

The world is out of its control under the use of atomic bombs.

Hysteria gives the world incitement in the media.

These are the way how Illuminati settled the world.

Who could answer the above and solute all problems?

United Nations is only contained with lies.
