

Russia and after

Kuroda International Consulting

Takeshi Kuroda

The collapse of Russia is a tragedy and nightmare for the world since no one stands against the New world order.

President Putin is totally frightened to face the world. He knows who they are. But he was missing even the truth. They are the Satan.

He was the only one who stood against all these realities.

What Russia has is the only possibility to stand against the world. The age of the 20th Century is a century of space development.

There is Orange Revolution is the revolution that the CIA caused. And Mr. Zelensky participates in all processes. The American military-industrial complex must be happy about this war.

Who has a plan for Russia in the future? Out of any doubt, that is all Illuminati.

But we could find justice in the world as all media ask themselves under all control of the CIA.

Under all these circumstances, we may not even find hope in the future.

And what can we find in the future? That is world war 3rd.

But instead of any realities, we had proposed all ideas and proposals from our office to the world as we tried to seek a new world then.

We all have a decision for the future. That must be any hopes we could find to the world.
