

Russia and the western camp

Kuroda International Consulting

Takeshi Kuroda

Inhumanity from Russian reality is accused by international society. That is all justice of the western camp. But we must see all tails they have a new world order.

We have an idea that Russia and China, with their secret police, are all they do in the world. All these are any realities of any tails if we make ourselves in politics.

But on the other hand, we find justice and all progressed humanity. We may find all hopes with those, but how may we judge them all in reality?

All people follow all justice and humanity values, but a part of all those realities are from the CIA.

Let me ask you a question. If based on all truth of the world, we may judge the invasion of Russia. What could be a decision?

So we may be wise to face the reality that all peoples of Ukraine are the only truth, so we need to share the justice.

This is a way we are trying to work for. As we may build a world, and we may share the world.

According to all its justice as we face any reality of the world, what is a decision we may find in reality?

We are trying to make any calculation to reality, and then we see that any judgment under humanity is always right as we are not spending on any crimes.

This is the right way we may seek the world and futures.
