

Russia's complete defeat and new world

Kuroda International

Takeshi Kuroda

With their economy may not reach the future. That is a complete defeat of Russia. The world under the cold war now ends in a new future.

New technological civilization was based on this victory. That is their dream of a western camp.

Since Russia may not reach all these realities by this defeat.

Construction of a new world reality could ask the future except for Russia. That causes a new reality with the coming next society.

The free economy system standardizes the new reality of the world.

As we see all new social systems and technological growth from the USA, that is definitely with a future.

That bases on this victory and waiting for the last emperor, which must be a China.

Western camp must rise up his justice and take all pies.

These are with full participation to the universe that Western camp must dream himself with their future.

I do doubt that the others from themselves have a ticket to this new future.

The world is facing a future that forces us to make a decision.
