Russia and nuclear weapon is a new reality in the world, and how can we forecast the future?  
This is the right idea we have.

How the use of nuclear is accepted in the world society. And what is a world decision?

But all these traps make Russia collapse. We have to see who seeks a war.

After, we may find justice from a world to a new world.

CIA and all people from the media can make a decision about the world.

Western camp must rim their hand and work for all solutions. This is a reality of the new world order.

And we have Taiwan and the middle east. The world tries to seek the future. That is all reality we have in the future.

On the other hand, we propose and try differences in the future.

But all these circumstances seek the end of history. We all are equally facing decisions.

Suppose we could propose a new idea. What is the difference in the world?

The absolute supremacy of the Western camp, as the third pole, demands of itself at least the same reality.
