

Russia and the world after

Kuroda International Consulting

Takeshi Kuroda

Twenty billion dollars is demanded for a day's warfare, and military weapons are depleted. This is the future of his nation. The world faces this reality.

The world has two poles. In the most profound understanding, these are the difference between goodness and evil.

If the Russian has a collapse himself in the future, how could you expect the world after?

And we can see justice with all related in Ukraine.

All these end themselves in the future, and we can see a last emperor called the People's Republic of China. He is a king of the east who is facing Western camps.

We could have a feeling that we have the end of history. And the world has a plan for the future.

We have only permission to stand equal to NATO under our military forces. And you may know that world war 3rd is only a decision we are trying to make.

To settle all these circumstances, there are all decisions from space that we could work for in the future.

How could we find justice, and who follows them? That gives a new reality we have any possibility to the future.

Equality and independence are the only demands in any history as the future.
