

Russia shock

KURODA International

Takeshi Kuroda

Economic blockade and meltdown of own economy are more than any imagination with Russia. And inland people's minds have changed forwarding to Western Camp.

These are more than a nightmare for China because they face the same reality. This point I suggest with own description. The truth of the world for them to be with the first time they met.

Without any doubt, these effects if working of the CIA. They were missing all realities.

We have known that coming future, the world will face new realities,

All people live dreams, but they must face reality one day.

Their industry must face all reality of the world. Top technology and system are forwarding to the future.

These are the right idea we may face in the future. Liberalism is a justice facing any world's reality as they may call the other Satan.

Freedom is all envy the world follows. All these realities are under Russian invasion, and the truth goes on.

With all curiosity, the world do not have any doubt. But one day, we must face truth and reality.
